WORK EXPERIENCE

Frontend & Operations Intern | *TapNex (NexGen FC), Bengaluru*

Jul 2025 – Jan 2026

- Developed production-grade SaaS web applications using **Next.js**, **React**, **TypeScript** and **Tailwind CSS**; integrated **REST APIs**, implemented **JWT authentication** workflows and followed **Agile/Scrum** development practices.
- Contributed to two enterprise client platforms (J-TAP and LIMP) through frontend engineering, API integration, testing, debugging, Git-based version control and cross-functional stakeholder collaboration.
- Worked closely with backend, AI and product teams to translate business requirements into scalable, maintainable software solutions; participated in **CI/CD** pipelines and **Docker**-based deployment workflows.

Operations Lead | *Cognito Club, Jain University*

Aug 2025 – Apr 2026

- Spearheaded operations for a technical student club; led cross-functional teams, coordinated large-scale technical events, managed sponsorships, logistics and end-to-end operational execution.
- Improved internal planning processes and inter-team collaboration, overseeing successful delivery of multiple campus-wide initiatives.

PROJECTS

CareerPilot AI – *Agentic AI Career Operating System*

GitHub

- Built a **multi-agent AI platform** using **LangGraph**, **LangChain**, **RAG** and **OpenRouter LLMs** with agent orchestration for resume analysis, interview coaching, application tracking and personalised career recommendations.
- Architected scalable **Next.js** frontend with **PostgreSQL/Supabase** backend, **REST APIs**, **vector search** workflows, **Supabase Authentication** and interactive dashboard analytics.

Chronova AI – *Intelligent Academic Scheduling Platform*

GitHub

- Developed an **AI-powered timetable management system** for institutional scheduling – teacher allocation, subject assignment and conflict-free timetable generation using **Next.js**, **Flask**, **PostgreSQL** and **Supabase**.
- Integrated **REST APIs**, AI-assisted scheduling workflows, **JWT authentication** and responsive dashboards for admin and faculty roles.

Attendance Management System – *Jain University Placement Department*

- Built a full-stack **role-based attendance platform** using **Next.js**, **SQL**, **PostgreSQL** and **Supabase** with real-time tracking, secure **Supabase Authentication** and admin/student dashboards.

Cinematographer Portfolio Website

Live

- Designed and deployed a responsive **React.js** portfolio website for a professional cinematographer; optimised media assets using **Cloudinary** and **HandBrake**, hosted on **Render**.

CLIENT PROJECTS

(via TapNex)

J-TAP – *AI-powered Training & Placement Platform*

- Contributed frontend engineering to an institution-scale SaaS platform supporting **8,000+ concurrent users** across Student, Trainer and Admin roles; built using **Next.js 14**, **React 18**, **TypeScript**, **Tailwind CSS** and **NestJS**.
- Worked on frontend modules for QR-based attendance, syllabus management, assessment flows and self-learning hub; integrated **REST APIs** and **AI-enabled workflows** including Resume Analyser, Personalised Learning Path, Risk Detection and a Natural Language Query System powered by an **8-agent Gemini LLM** orchestration layer.

LIMP – *Land Intelligence Management Platform*

- Contributed to an enterprise land management SaaS using **Next.js**, **Django REST Framework**, **PostgreSQL**, **JWT Authentication** and **Docker**-based development; worked across role-based access for 8 user personas.
- Developed responsive dashboards, integrated backend APIs, collaborated in **Agile sprints** and participated in debugging, testing and deployment activities using **GitHub Actions** CI/CD pipelines.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL

Frontend: HTML5, CSS3, React.js, Next.js, Tailwind CSS, shadcn/ui, Responsive Web Design

Backend: Node.js, NestJS, Flask, Django REST Framework, REST APIs, JWT Authentication, Supabase Authentication

Databases: PostgreSQL, MySQL, Supabase, SQLite **Cloud & Deployment:** Docker, Vercel, Render, Cloudinary, GitHub Actions

AI & LLMs: LangChain, LangGraph, CrewAI, RAG, Prompt Engineering, OpenAI API, Gemini API, Ollama, OpenRouter

Automation & Tools: n8n, Git, GitHub, VS Code, Postman, Figma, npm, HandBrake, Chrome DevTools

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Other: JSON, Markdown, API Integration, Version Control, Software Debugging, Agile/Scrum

EDUCATION

Jain (Deemed-to-be) University, Bengaluru

Aug 2023 – May 2027

Bachelor of Technology – Computer Science Engineering (AI & ML)

CGPA: **8.40/10**

Class XII: 72.6%

Class X: 87.5%
