WORK EXPERIENCE

Full Stack & Operations Intern

Jul 2025 – Jan 2026

TapNex (NexGen FC)

Bengaluru

- **J-TAP:** Developed frontend modules for an institution-scale SaaS (**Next.js 14, React 18, TypeScript, NestJS**) serving **8,000+ concurrent users**; integrated AI workflows — Resume Analyser, Personalised Learning Path and a Natural Language Query System via an **8-agent Gemini LLM orchestration layer**.
- **LIMP:** Built role-based dashboards for **8 user personas** on an enterprise land management SaaS (**Next.js, Django REST Framework, PostgreSQL, Docker**); shipped features through **GitHub Actions CI/CD** pipelines in Agile sprints.
- Implemented **JWT authentication**, REST API integrations and Git-based version control across both client platforms; collaborated with backend, AI and product teams in cross-functional Agile/Scrum workflows.

Operations Lead

Aug 2025 – Apr 2026

Cognito Club, Jain University

Bengaluru

- Led cross-functional teams for a technical student club; managed sponsorships, logistics and end-to-end delivery of multiple large-scale campus-wide technical events.

PROJECTS

CareerPilot AI | *Next.js 14, TypeScript, LangChain, LangGraph, RAG, OpenRouter, Supabase* | [Live](#) | [GitHub](#)

- Built a **6-agent agentic AI career platform** (Resume Architect, Job Hunter, Interview Coach, Email Agent, Career Navigator, Autopilot Orchestrator) using **LangChain, LangGraph** and **RAG** for end-to-end automated job search with human-in-loop approval.
- Integrated **Gmail API (OAuth 2.0)** for AI email monitoring, live job scraping, **Web Speech API** voice interviews, ATS scoring engine and a **22-table Supabase/PostgreSQL** backend with RLS and AES-256-GCM token encryption.

Chronova AI | *Next.js 16, React 19, TypeScript, Zustand, OpenRouter, Supabase* | [Live](#) | [GitHub](#)

- Developed a **dual-portal AI scheduling platform** — student portal (AI study coach, Pomodoro timer, exam tracker, burnout detection) and institution portal (conflict-free timetable generator, teacher roster, admin/teacher roles) with **OpenRouter LLM multi-model fallback** and human-in-loop change confirmation.
- Architected **PostgreSQL/Supabase** backend with **Row Level Security** across 15+ tables, role-based auth (**Student / Admin / Teacher**) and streaming AI responses; deployed on **Vercel**.

SARTS | *Next.js 14, TypeScript, NextAuth.js, Supabase, Recharts, Leaflet* | [Live](#) | [GitHub](#)

- Built a real-time **federated equipment rental platform** (Caterpillar Hackathon 2025) — **500 assets, 25 cities, 20,000+ rental records**, 3 role-walled portals; engineered **demand forecasting**, anomaly detection, live Leaflet map with geofence-breach detection and a custom **PDF report builder**.

The Agora Club | *Next.js 16, Prisma 7, PostgreSQL, Tailwind CSS v4, Resend* | [Live](#) | [GitHub](#)

- Built a **full-stack gamified community platform** (XP, streaks, badges, leaderboard) with member portal, admin back-office and a hand-rolled **HMAC-SHA256 auth system** (PBKDF2 hashing, rate-limited login); designed a **17-model Prisma schema** with automated badge milestones and transactional email via **Resend**.

Attendance Management System | *Next.js, PostgreSQL, Supabase* | *Jain University Placement Dept.*

- Delivered a full-stack **role-based attendance platform** with real-time tracking, **Supabase Auth** and Admin/Student dashboards for the university placement department.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Java

Frontend: Next.js, React.js, Tailwind CSS, shadcn/ui, Zustand, Framer Motion, Recharts, Leaflet, HTML5, CSS3

Backend: Node.js, NestJS, Flask, Django REST Framework, REST APIs, JWT Auth, NextAuth.js, Prisma ORM, Supabase Auth

Databases: PostgreSQL, Supabase, MySQL, SQLite

AI & Agentic: LangChain, LangGraph, CrewAI, RAG, Multi-Agent Systems, Prompt Engineering, OpenAI API, Gemini API, OpenRouter, Ollama, Vector Search

AI Automation: n8n, Agent Orchestration, Human-in-Loop Pipelines, AI Workflow Automation

Cloud & DevOps: Docker, Vercel, Render, GitHub Actions (CI/CD), Cloudinary

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Agile/Scrum

EDUCATION

Jain (Deemed-to-be) University

Bengaluru

B.Tech – Computer Science Engineering (AI & ML)

Aug 2023 – May 2027

– CGPA: **8.40/10** | Class XII: 72.6% | Class X: 87.5%
